Work Experience

Mesa Public Schools – Web Programmer February 2017 – Present

- Currently developing an application for parents to pick the right school for their children. The front-end is a SPA written in Vue.js and uses Vuex(state management) and Vue Router(routing). The back-end is built with Laravel and is made up of two parts, an administrative dashboard to manage school data and an API to serve this data to the front-end.
- Help maintain and troubleshoot the main district website, www.mpsaz.org. This is a custom PHP CMS that was built around 10 years ago. Most work involves bug fixes and some refactoring.
- Manage all Google Suite products for the district: Gmail, YouTube, Google Groups and others. This involves fielding phone calls and emails about issues from setting up Gmail filters and whitelisting domains, to unblocking YouTube videos.

Internship

UTILITWORX – Web Developer November 2016 – December 2016

- Assisted in development of a Laravel based project and financial management system for major construction company in California.
- Worked remotely with Chicago based team. Participated in weekly standup meetings, and communicated daily with the team via Slack.
- Mainly fixed style issues and some JavaScript bugs.

Education

CareerFoundry Web Development Certification, October 2015 – March 2016

- 6-month online coding Bootcamp that specializes in Ruby on Rails and front-end development.

Arizona State University B.A. Philosophy, August 2004 – May 2010

- Developed critical thinking and communication skills by studying arguments.
